Major Depression (Range 0-30)	10	1	68.1

Community Percentiles for Subscale 13-18 years

<b>Client Name</b>	John Smith
--------------------	------------

### Scoring and Interpretation Information

A Total Anxiety Scale score (sum of the 5 anxiety subscales) and a Total Internalizing Scale score (sum of all 6 subscales) are derived, with higher scores indicating increased symptom severity. In addition, scores are presented for each of the six subscales.

Subscale scores are converted into percentiles, based on age, compared to the Australian community sample (de Ross et al., 2002). A percentile score of 50 represents average levels of symptoms compared to age related peers, whereas a percentile above, for example, the 90th percentile indicates high levels of symptoms.

Sub-scales are computed by summing the following items:

Separation Anxiety: items 5, 9, 17, 18, 33, 45, 46

Social Phobia: items 4, 7, 8, 12, 20, 30, 32, 38, 43

Generalized Anxiety: items 1, 13, 22, 27, 35, 37

Panic Disorder: items 3, 14, 24, 26, 28, 34, 36, 39, 41

Obsessive-Compulsive: items 10, 16, 23, 31, 42, 44

Major Depression: items 2, 6, 11, 15, 19, 21, 25, 29, 40, 47

### Client Responses

		Never	Sometimes	Often	Always
1	I worry about things	0	1	2	3
2	I feel sad or empty	0	1	2	3
3	When I have a problem, I get a funny feeling in my stomach	0	1	2	3
