● Psychological Well-Being Percentile

Scoring and Interpretation Information

Results consist of a single psychological well-being score (between 8 and 56), where higher scores represent higher levels of well-being, resources and strengths. Scores are also represented as a percentile derived from a normative sample. A percentile of 50 represents typical (and healthy) levels of psychological well-being. Percentile scores below 15 indicate low well-being and are likely indicative of clinical mental health concerns where further assessment is
