

Client Information

<i>Client Name</i>	John Blogs
<i>Date of birth (age)</i>	16 December 2000 (20)

Assessment Information

<i>Assessment</i>	Generalised Anxiety Disorder Assessment (GAD-7)
<i>Date administered</i>	3 May 2021
<i>Assessor</i>	Dr Ben Buchanan'
<i>Time taken</i>	0 minutes 7 seconds

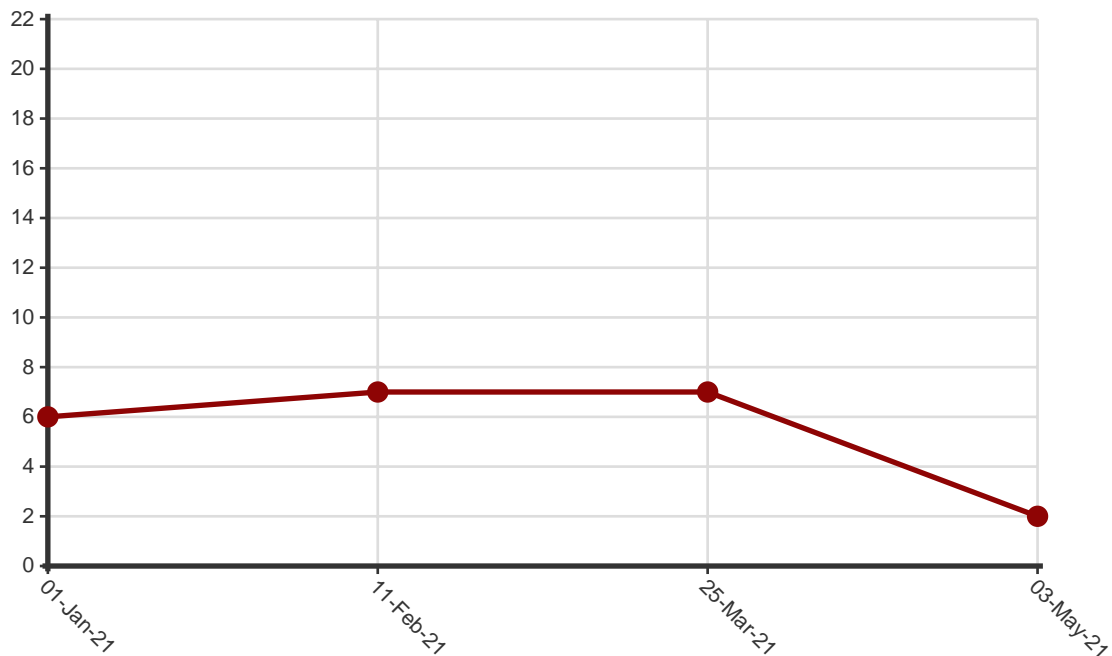

Results

	Value
Score	2
Percentile (male cohort)	41.3

Interpretive Text

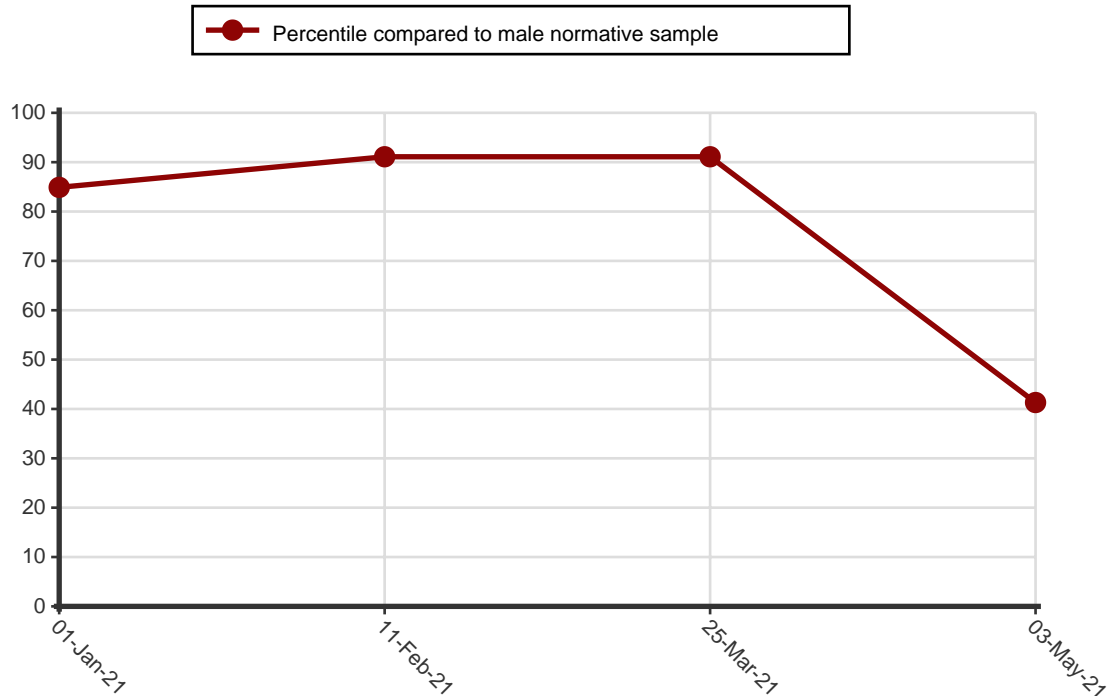

This individual did not score in the anxiety range

—●— GAD-7 total score

Client Name | John Blogs

Scoring and Interpretation Information

A raw score (from 0 to 21) is presented as well as a percentile rank based on the Lowe et al. (2008) community sample. Given that females score slightly higher than males, a percentile for each gender is presented - the appropriate gender percentile should be selected for interpretation.

Percentiles provide a useful context for comparing a respondents results with a normative sample. A percentile of 50 represents typical (and healthy) patterns of responding, while higher percentiles represent higher levels of anxiety symptoms.

Client Responses

		Not at all	Several days	More than half the days	Nearly every day
1	Feeling nervous, anxious or on edge	0	1	2	3
2	Not being able to stop or control worrying	0	1	2	3
3	Worrying too much about different things	0	1	2	3
4	Trouble relaxing	0	1	2	3
5	Being so restless that it is hard to sit still	0	1	2	3
