

Client Information

<i>Client Name</i>	Generic Client
<i>Date of birth (age)</i>	14 December 2010 (11)

Assessment Information

<i>Assessment</i>	Multidimensional Assessment of Interoceptive Awareness - Version 2 (MAIA-2)
<i>Date administered</i>	29 June 2022
<i>Assessor</i>	Dr David Hegarty
<i>Time taken</i>	5 minutes 17 seconds

Results

	Average Score (0-5)	Normative Percentile
Noticing	3.25	46
Not-Distracting	2.67	77.7
Not-Worrying	3.2	78.8
Attention Regulation	2.71	44
Emotional Awareness	4.2	78.6
Self-Regulation	3.75	83.2
Body Listening	2.33	54.4
Trust	4.33	80.6

Scale Percentiles

Client Name	Generic Client
--------------------	----------------

Scoring and Interpretation Information

Scores are between 0 and 5, where higher score equates to more awareness of bodily sensation. A percentile is also calculated, indicating how the responded scored in comparison to a normative sample. Interpretation using percentiles helps contextualise scores. For example, percentile below 50 indicate that the individual scored below what is typical. Extreme percentile scores (below 10 or above 90) are of particular clinical significance.

The MAIA-2 consists of eight scales:

1. Noticing (Items 1-4): Awareness of uncomfortable, comfortable, and neutral body sensations
2. Not-Distracting (Items 5-10): Higher scores suggest a more tuned in relationship to unpleasant sensations, and is typically considered to be adaptive. Lower scores indicate the tendency to ignore or distract oneself from sensations of pain or discomfort.
3. Not-Worrying (Items 11-15): Higher scores indicate less rumination about discomfort. Low scores indicate emotional distress or worry with sensations of pain or discomfort
4. Attention Regulation (Items 16-22): Ability to sustain and control attention to body sensation
5. Emotional Awareness (Items 23-27): Awareness of the connection between body sensations and emotional states
6. Self-Regulation (Items 28-31): Ability to regulate psychological distress by attention to body sensations
7. Body Listening (Items 32-34): Actively listens to the body for insight
8. Trust (Items 35-37): Experiences one's body as safe and trustworthy

The results from the MAIA-2 focus upon the individual scale scores as a total score is not meaningful (Mehling et al., 2012).

Client Responses

		Never	Very Rarely	Rarely	Occasional ly	Very Frequently	Always
1	When I am tense I notice where the tension is located in my body.	0	1	2	3	4	5
2	I notice when I am uncomfortable in my body.	0	1	2	3	4	5
3	I notice where in my body I am comfortable.	0	1	2	3	4	5
4	I notice changes in my breathing, such as whether it slows down or speeds up.	0	1	2	3	4	5
5	I ignore physical tension or discomfort until they become more severe.	5	4	3	2	1	0
